**RE: Wildflower Community Smoke Detectors and Air Testing**

Hello everyone,

As of Friday, we have completed all major cleaning of the buildings at Wildflower, including all insulation replacement and all duct cleaning.

Over the next several weeks we will be conducting air quality testing (some units already complete) and changing out the smoke detectors. We will be installing combination smoke and carbon dioxide detectors. Some of the initial detectors were not combination units, if you did receive one of those, we will exchange it for a combo.

Over the next week we will be removing the port a potty and all remaining POD's that are ours.

Please call me if anyone has questions.

Thanks.
